

## **Blowing the Lid Off! Uncommon Jewelry with Common Objects** **With Richard Salley**

### **Supply list:**

- Sheet copper or brass (24 or 26 gauge) approx. 6 inches x 6 inches minimum.
- Four or more bottle/jar metal lids (approx. 1 ½ - 2" in diameter like Snapple, Starbucks Frappuccino, baby food jars, etc.)
- brass or copper wire in 20, 14 and 16 gauges (approx 20 feet or so should do)
- Bring a variety of found objects such as buttons, game pieces, old jewelry, fossils, minerals, and industrial materials (chain, electronic parts, etc.) to incorporate into the design of the completed piece.

### **Tool list:**

- Basic jewelry making tools will be needed, including round nose and flat nose pliers, wire cutters (flush cutters recommended)
- Jeweler's saw and #0 or #00 blades
- Bench Pin
- Bench block (bring something for dampening the hammering noise such as a shot bag or towel)
- Metal snips or cutters (if you already have some)
- Scissors
- Ruler
- Metal files
- Ball peen hammer
- Small riveting hammer
- Small bench block
- Rag or towel to sound proof hammering
- Ear plugs (if needed)

### **Optional:**

I will have some of these to share, but bring your own if you have them

- Dremel Tool or similar rotary tool for drilling and #56 drill bit or 1/16 inch drill bit
- Hole Punch Pliers (1.25mm) available at <http://www.fusionbeads.com/shop/product/31924/>
- Center Punch
